AN INTRALOGISTICS COMPANY  
TOWARDS  
THE ADVANCED FUTURE

Established 1982

Automatic Storing and Filing Systems for Warehouses  
and Documental Archives.

CYBER SRL - ITALY - 44100 Ferrara - Via M. M. Plattis, 32  
Ph. +39 0532 67317 - Fax + 39 0532 61571 mail: [cyber@cyber-italia.com](mailto:cyber@cyber-italia.com)

# AN ENGINEERING COMPANY IN THE ADVANCED FUTURE

“ Logistics is strategic for the Company's competitiveness.

An efficient reorganization of the Intralogistics guarantees important costs and productivity recoveries.

**CYBER is a leader company in studying and suppling Intralogistic Systems for Goods Warehouses and Documents Archives.** ”

Cyber operates as Product Engineering Company in Intralogistics field since 1982.

Cyber studies and supplies Logistic Solutions for the mechanized management of Goods Warehouses and Documents Archives, starting from a Feasibility Study with technical and economic evaluations and defining an executive Project according to the Customer's needs.

- The functioning of Cyber Archiving and Warehousing Systems can be interfaced with the management information system in order to automate its functions and can be equipped with bar code readers and RFID.
- This allows to reduce some traditionally high costs related to Intra-logistics, such as the occupied area, the picking procedures, the operations efficiency, the security, the traceability.
- In addition to "standard" solutions (always modular, flexible and expandable), Cyber proposes Special Projects to satisfy any kinds of needs, for example the management of particularly bulky materials.
- Cyber logistic solutions are turnkey projects, with assistance for start up procedure and an efficient after-sales service.

Cyber analyses the Customer's Warehousing problems and Data Archives.

Following a precise evaluation, Cyber proposes a Project based on its know-how and technology, in order to improve the warehouse's or archive's logistic and operative organization.

Cyber offers its Software Cyber.Doc and Cyber.Store for the piloting and the control of the logistic systems and of all related functioning operations.

#### CYBER ENGINEERING GUARANTEES:

- Quality;
- Order and organization in the warehouse and archive mapping;
- Speed in picking operations;
- Updated inventory;
- Elimination of errors in the logistic chain

Cyber Engineering is able to integrate all organization, application and technological components acting as **System Integrator and Coordinator of all operations**, in order to provide an efficient solution for the logistic project and to completely satisfy the Customers

ENGINEERING  
**CYBER**  
LOGISTICS

1. Cyber studies and supplies Mechanized Systems for the Organization of Documents and the Logistic Management of Warehouses.
2. Cyber performs the Installation of Logistic Systems and offers a specific training for the Customer's technical staff.
3. Cyber performs the System Start-up and supports the Customer during all operations.
4. Cyber offers the important After-Sales Service for the Customer.
5. Cyber guarantees the important Logistic Consultancy Service since the beginning of the Feasibility Study.

## 1982 - 2017: 35 Years of Cyber Activity

"We firmly believe that the quickness of our After Sales Assistance Service and, furthermore, the Quality of our Supplies and Installations are the most important principles to ensure strong guarantee for our Customers."

Cyber was founded in 1982 as a Company of Engineering Product in the field of Logistics and Services for the organization and management of goods, documents and information.

From the very beginning, one of the main mission of Cyber's technical staff has been studying specific solutions that could allow Customers not only to compact their "tanks" of documents, saving space and acquiring speediness and safety while searching and organizing information and also to create "Organized Archiving Systems" aimed at reaching a logic and organic vision of the whole archive.

Pharma Intra Logistics Distribution Centres Organization: this is one of our most important goal too.

Design and Production of Archives, seen as vital "tank" of products and information, have been one of our Technical Staff main aims while creating our Company's Studies and Projects. Thanks to these features, Cyber plays the role of a "Consulting Engineering Company" and "Engineering Production Company".

### Our most important customers:

MINISTRY OF JUSTICE  
MINISTRY OF INTERNAL AFFAIRS  
MINISTRY OF DEFENCE
